

Broadcast news simulation – Key piece

Task: You are to plan and produce a news programme that features current day news issues.

You must include all the areas of broadcasting the news that we have learnt so far, such as: find, gather, write, assemble, order, broadcast. In addition, you need to make sure you answer the 5 Ws and use the 3 Cs. Make sure your reports are objective and that you use correct facts.

Your news programme should follow the running order below:

- What's coming up on the programme/news headlines
- Welcome from the presenters
- News story 1
- News story 2
- News story 3
- Sport
- Weather
- Goodbye (outro)

You must make sure that you have prepared and gathered the news in time for when you go on air and that it has been produced to a professional standard.

I look forward to watching your news broadcast and good luck!
